**Performance Indicators for July 2009**

## Performance Monitoring Report – for July 2009

### Summary

Performance information for the 09/10 financial year for July 2009 is supplied to allow the Executive Board to monitor the performance of selected PIs (Performance Indicators) and identify any service areas where improvement is necessary.

### Recommendation

**That the Executive Board considers the performance and proposed remedial action against these PIs for the 2009/10 financial year until July 2009.**

#### a) Reasons for Recommendation

This report demonstrates our progress in achieving targets set for relevant PIs and highlights areas of concern.

#### b) Alternative Options

None.

#### c) Risk Considerations

A failure to make satisfactory progress in addressing the areas of concern may lead to the Council being criticised by its customers, by inspectors in a future inspection and could also compromise the Council's reputation and budgets.

#### d) Policy and Budgetary Considerations

One of our corporate goals is 'Excellent service for our customers' and these performance reports help members understand whether we are improving services from our customers' point of view. Quarterly and monthly performance monitoring conforms with existing Council policy and the Council's current budget. However, any consequent improvement action could have policy and financial implications.

#### e) Date for Review of Decision

Performance information is provided on a monthly basis.

---

### Main Body of the Report

1. As usual the PI report shows year-to-date progress for each indicator monitored on a monthly basis. An explanation for this report is shown below.
2. The column marked 'Top Quartile District Councils' shows the threshold figure for top quartile performance based on 07/08 district figures.

2. The +/- column indicates whether a positive or negative result is preferable. For example, with a PI such as the time taken to process benefit claims or sickness absence, a lower result is better. However with a PI like Council Tax collection, the higher the result the better. A “+” indicates where a higher result and corresponding upward trend is desirable, whereas a minus sign indicates that the lower the result, the better.
3. The ‘Current Target’ column represents the annual target in most cases except for BV10 and BV9 where the target increases as more Non-domestic rates and Council Tax are collected and for BV12 where the target increases as working days lost increase as the year progresses.
4. The ‘Management Notes’ row relates to the PI above and enables the responsible officer to explain current performance.

---

### **Legal Implications**

There are none arising from the recommendations in this report.

### **Financial Implications**

There are no direct financial implications.

### **Consultation on Reports to the Executive**

Relevant Heads and officers have contributed to the appendix.

### **Background Papers**

The performance monitoring report for the 2009/10 financial year until July 2009 appears as an appendix to this report.
